

JOHNS HOPKINS MEDICAL IMAGING

Upgraded 3T MRI Scanner at White Marsh

We are pleased to announce upgrades to our 3T MRI scanner at White Marsh! As part of our continued efforts to provide high-quality imaging services to you and your patients, these enhancements offers quicker exams with exceptional image quality and increased comfort.

- 3T strength with weight capacity up to 550 lbs.
- 70cm open bore with an ultra-short magnet of 173cm allowing for more head-out exams.
- Up to 97% reduction in sound, particularly for neurology and orthopedics exams.
- State of the art technology and software enables faster, high-resolution images for body, breast, prostate, angiography, and oncology imaging exams.
- Improved image quality with the new AI technique, Deep Resolve. Improved metal imaging techniques with WARP. Advanced techniques such as Twist-vibe for improved vascular imaging. Faster imaging times with Simultaneous Multi-Slice (SMS).
- Our White Marsh office is conveniently located on the first floor and offers free parking as well as overnight and weekend hours.

All MRI exams from Johns Hopkins Medical Imaging locations are read by Johns Hopkins radiologists with the appropriate subspeciality experience and expertise. Patients can view their reports and images online through MyChart.

Thank you for trusting us as your imaging provider!
