Expectations for Clinical Students:

We Expect:

- Professionalism-

- High level of communication between clinical instructor, students and unit staff. Please notify if leaving unit at any time, for breaks and lunch, and at end of day. Students should not be performing any patient care if clinical instructor is off unit.
- Arriving on-time, or early if unit recommends. Leaving clinical day at designated time.
- Dress Code: School issued scrubs. Please do not wear Navy Scrub pants and top as that is our JHHS Nursing Scrub color.
- Wearing appropriate scrub attire and identification for clinical area. Identifying self as a student while in the clinical setting.
- We encourage a high level of engagement/activity for students and instructors in their patients care and needs. In general, we don't anticipate your clinical group to experience a lot of "downtime".

- Clinical Knowledge and Safety-

- If Giving medications; all medications must be given under the **Direct supervision** of the clinical instructor or JHHS RN Preceptor. All steps of this administration process are to be validated and observed by the instructor or preceptor. All medications will need to have a co-signature from the instructor or Preceptor within Epic.
- Ensure to document in real time, and to not delay the entries of VS, or assessments as this may delay the patients plan of care.
- If you or your instructor are unsure about an order, policy, procedure or protocol, please do not hesitate to ask the nursing staff.
- Provide care only to the patients in which you have been assigned by your clinical instructor. If you have been invited to assist or participate in care of another patient, please be sure your instructor approves this, and that you are properly supervised.
